Consumer Input...

As a software engineer, I believe that Microsoft has acted only in their best interests. I understand their position and their argument. But their monopoly is obvious.

My input...

Please make sure that the monopoly practices are stopped. This can only happen with specific and general restrictions and penalties. There needs to be a system set up to investigate and resolve any further misdeeds. We are talking about Billions of dollars - so misdeeds will happen. There must be measures in place to handle this.

Thank you,

Dean Lythgoe
